Develop distribution method		
Distribute forms		
Consider confidentiality		
My comments: What is the goal of the surveys? Is it to improve the court process for children, reduce permanency times for youth, is it to better serve children and families through informed decision making?		
Another comment: Your 6 months outcome should reflect how far along you are with whatever your goals is: such as information will be analyzed and recommendations for improvement brought to stakeholders. The things you have as outcomes would fit perfectly in the action steps.		
One more comment: I would suggest that you move "Consider confidentiality" up to #3.		
<b>Great job and great ideas by the way. Please make adjustments, delete my comments and send the final copy</b>	Howard	5/06/09 or as soon as possible
