Question submitted by vendor

Question: What storage solution is going to be part of this overall solution? We want to make sure there are no fiber infrastructure issues with the components we will be responding to this RFP with. Specifically I am interested in the following:

1. Make and model of the SAN disk vendor (HP, EMC, IBM, HDS, NetApp, etc.)
2. Make and model of any intermediate fiber switching vendors that would be between this solution and the primary disk.

Answer: SAN make/model is Gateway E-842R with 12 - 300GB SAS disks and Four 4Gb Fibre Channel interfaces.

There is no intermediate switching in place currently, but it is requested in the RFP, so the switches quoted would be the only switches present.
